## LTI SERIES

# 3 PHASE INVERTER DUTY MOTORS

**LARSEN & TOUBRO**

It's all about Imagineering

## 3 PHASE INVERTER DUTY MOTORS

### About Larsen & Toubro

Larsen & Toubro is a technology-driven USD 7 billion company that infuses engineering with imagination. The Company offers a wide range of advanced solutions in the field of Engineering, Construction, Electrical & Electronics, Machinery and Information Technology.

L&T Electrical Standard Products, which form a part of the Electrical & Electronics business, is India's largest manufacturer of low voltage switchgear and has the scale sophistication and range to meet global benchmarks.

L&T Electricals have found acceptance not only in India but also over 40 countries across the globe.

### Environment & Community

The Company has a comprehensive Quality, Environment and Safety system. The manufacturing facilities conform to ISO 14001 (Environment Management System) & OSHAS 18001 by BVQI.

### Switchgear Design and Development Center

SDDC is the primary constituent supporting the Electrical and Electronics division's leadership, through its proven excellence in product design.

### Distribution

L&T's Electrical Standard Products Division is one of the largest distribution networks in the industry. These products are available through a network of more than 700 authorised stockists.

### Training & After-Sales Service

L&T's Electrical & Electronics training centers at Pune, Lucknow and Coonoor have state-of-the-art training facilities with well equipped workshops and testing systems. Over 75,000 participants have benefited from these programmes.

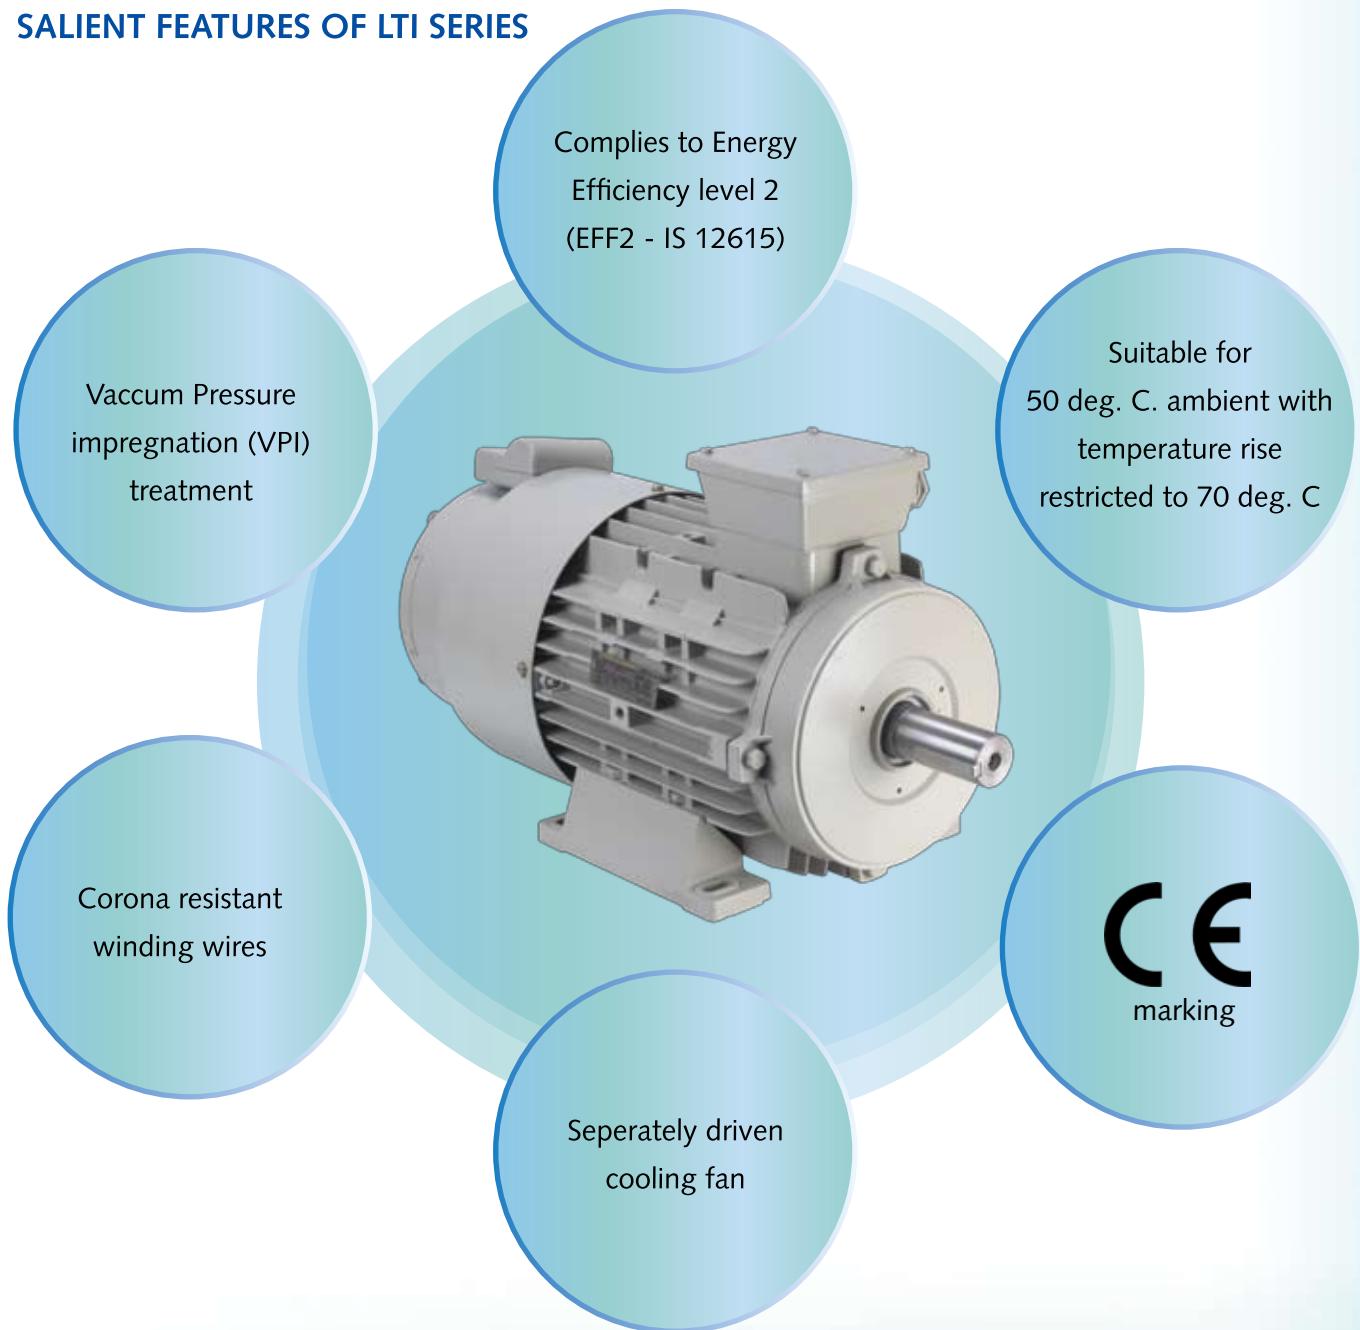

The Company has over 40 branch offices across the country and a network of over 100 service centres to deliver after-sales service to the customers.

### For us it's "Imagineering"

**Reliability** is always a need. The need provokes **imagination** of the human mind to deliver strength and elegance. Powered with strong **engineering** and streamlined design, L&T introduces complete range of low tension AC motors suitable for various market segments namely Industry, OEM, Energy & Infrastructure, Buildings and Agriculture. These power packed motors with innovative manufacturing techniques enable high performance, energy efficiency and sustainability.

## LTI SERIES OF 3 PHASE INVERTER DUTY MOTORS

### SALIENT FEATURES OF LTI SERIES

### LTI UNIQUE OFFERINGS

- LTI motors can operate from its rated speed to 10% of rated speed without any reduction in torque.
- LTI motors are suitable for lower speed or lower frequency operation
  - a. By "Constant V/f" for constant torque applications like extruders, lifts etc.
  - b. By "Variable V/f" for variable torque applications like Fans etc.
- LTI motors can be offered for constant power application in field weakening mode.  
Application : Winder - Rewinder
- LTI series offers specially designed motors which will operate at desirable base speed, reducing the associated cost.

## 3 PHASE INVERTER DUTY MOTORS

### BASIC FEATURES

#### "LTI" Motors Range

LTI series motors are 3 phase, TEFC Squirrel Cage Induction, Inverter Duty motors. These motors are available from frame size LTI 90 to LTI 315 having output ranging from 0.37KW to 200KW with 2,4,6,8 poles. Please refer back to us for higher pole requirements.

#### Voltage & Frequency

LTI motors are suitable for operation on 3 phase at  $415V \pm 10\%$  and  $50Hz \pm 5\%$  supply and combined variation of  $\pm 10\%$ . Please refer to us for motors with different voltage and frequency combinations.

#### Stator & Rotor Construction

Motors are available in Aluminium housing from frame 90 to 132.

Motors are available in Cast Iron housing from frame from 112 to 315. All motors in cast iron housing are with integral feet.

The complete range of motors are with high pressure aluminum die cast rotors.

#### Paint

Motors are provided with paint shade RAL 7032 that is suitable for tropical conditions. Special paints are available on request.

#### Enclosure

All motors shall have IP55 degree of protection which gives complete protection from dust & jets of water sprayed from all sides.

#### External Conditions: Ambient, Altitude & Humidity

All Motors are designed for an ambient of  $50^\circ C$  and maximum operational altitude of 1000 meters above mean sea level. The motors are designed for a relative humidity of upto 85%.

#### Insulation System & Temperature Rise

All motors are provided with class F insulation and temperature rise restricted to class B.

The winding temperature rise based on resistance method for various classes of insulation at  $50^\circ$  ambient temperature is as under (as per IS 12802)

|         |   |               |                                 |
|---------|---|---------------|---------------------------------|
| Class B | - | $70^\circ C$  | (Add $10^\circ C$ for Hot spot) |
| Class F | - | $95^\circ C$  | (Add $10^\circ C$ for Hot spot) |
| Class H | - | $115^\circ C$ | (Add $15^\circ C$ for Hot spot) |

## Mounting Arrangement

The standard inverter duty motors are foot mounted (B3). Motors can also be offered in the following mountings with various configurations as under:

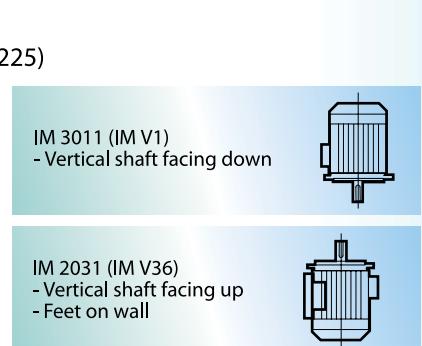

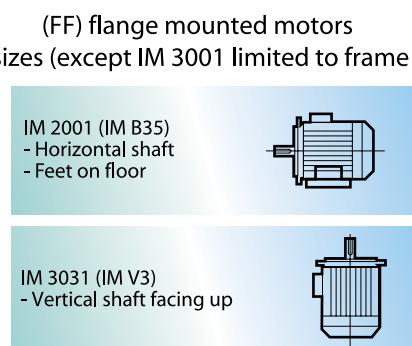

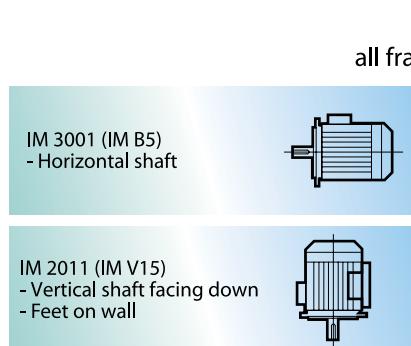

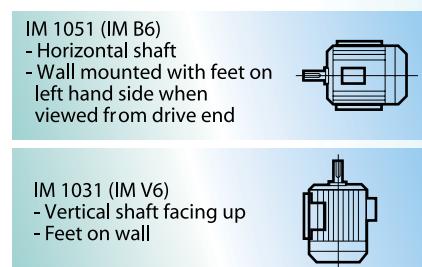

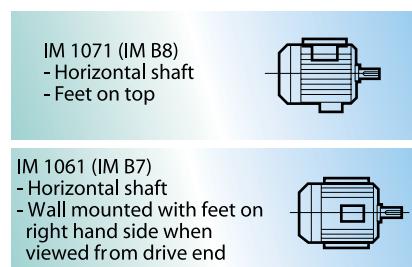

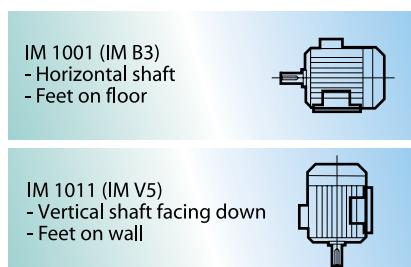

Foot : B3, B6, B7, B8, V5, V6

Flange (D) : B5, V1, V3, B35, V15 & V36

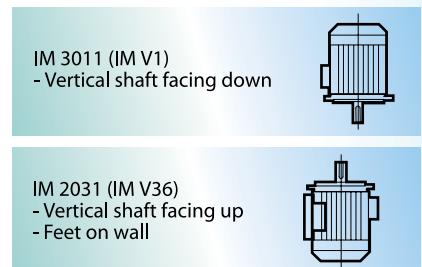

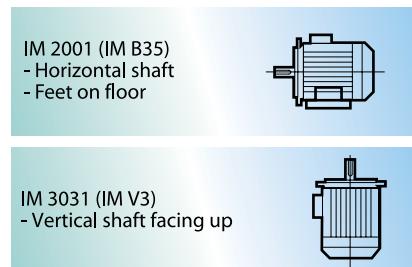

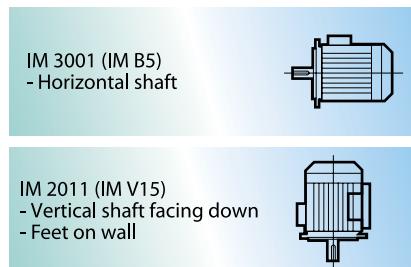

Face(C) : B14, B34

## MOUNTING ARRANGEMENTS

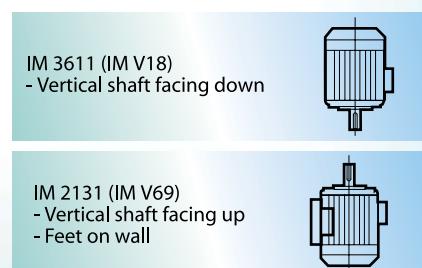

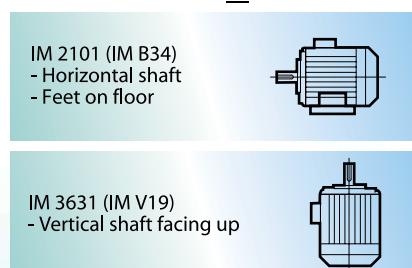

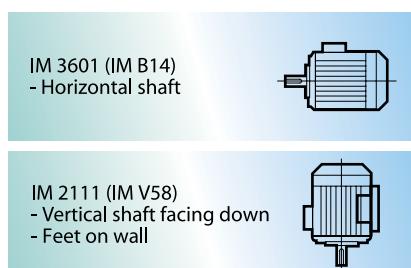

Foot mounted motors  
all frame sizes

(FF) flange mounted motors  
all frame sizes (except IM 3001 limited to frame size 225)

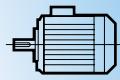

(FT) face mounted motors  
all frame sizes  $\leq$  132 mm

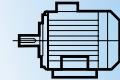

Motor without drive end shield is important: the protection(IP) specified on the IM B9 & IM B15 motor plates is provided to the customer when the motor is assembled.

IM 9101 (IM B9)  
- Threaded tie rods  
- Horizontal shaft

IM 1201 (IM B15)  
- Feet and  
threaded tie rods  
- Horizontal shaft

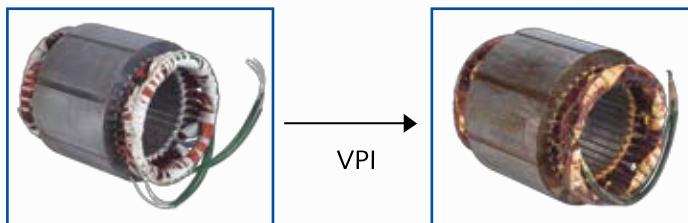

## 3 PHASE INVERTER DUTY MOTORS

### Winding & Impregnation System

Vacuum Pressure impregnation (VPI) is used for all motors with a polyesterimide Class H resin for the best electro-mechanical protection of the windings.

Motors are provided with **corona resistance** (Thermex 200 CR) winding wires suitable for high temperature withstanding capability.

### Cooling & Forced Ventilation

All "LTI series" are provided with separately driven axial cooling fan units running at constant speed.

The frame wise ratings of the motors are as shown in the table:

### BEARING DATA

| Frame | Poles | DE Bearing | NDE bearing |
|-------|-------|------------|-------------|
| 90    | 2,4,6 | 6205 C3 ZZ | 6205 C3 ZZ  |
| 100   | 2,4,6 | 6206 C3 ZZ | 6206 C3 ZZ  |
| 112   | 2,4,6 | 6306 C3 ZZ | 6306 C3 ZZ  |
| 132   | 2,4,6 | 6208 C3 ZZ | 6208 C3 ZZ  |
| 160   | 2,4,6 | 6209 C3 ZZ | 6209 C3 ZZ  |
| 180   | 2,4,6 | 6210 C3 ZZ | 6210 C3 ZZ  |
| 200   | 2,4,6 | 6212 C3 ZZ | 6212 C3 ZZ  |
| 225   | 2,4,6 | 6213 C3 ZZ | 6213 C3 ZZ  |
| 250   | 2,4,6 | 6215 C3 ZZ | 6215 C3 ZZ  |
| 280   | 2     | 6315 C3    | 6315 C3     |
| 280   | 4,6   | 6317 C3    | 6317 C3     |
| 315   | 2     | 6315 C3    | 6315 C3     |
| 315   | 4,6   | 6318 C3    | 6318 C3     |

| Frame | Ratings (Watts) |
|-------|-----------------|
| 90    | 90              |
| 100   | 90              |
| 112   | 90              |
| 132   | 90              |
| 160   | 135             |
| 180   | 135             |
| 200   | 155             |
| 225   | 155             |
| 250   | 155             |
| 280   | 180             |
| 315   | 180             |

### Bearings & Lubrication

All motors upto 250 frames have pre-lubricated bearing as a standard feature.

Frame 280 and above are equipped with re-greasable bearings and all motors are lubricated with requisite amounts of lithium base grease.

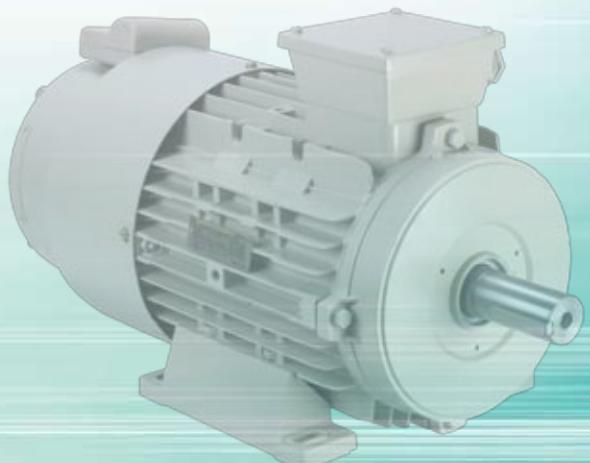

## GOVERNING STANDARDS

### INDIAN STANDARDS

- IS 325 : Three phase Induction motors.
- IS 1231: Dimensions of three phase foot mounted AC Induction motors.
- IS 2223: Dimensions of Flange mounted AC Induction motors.
- IS 2253: Designation for type of construction and mounting arrangements of rotating machines.
- IS 4029: Guide for testing three phase Induction motors.
- IS 4691: Degree of protection of electrical rotating machines.
- IS 4722: Rotating electric machines.
- IS 4889: Methods of determination of efficiency of rotating electrical machines.
- IS 6362: Designation of methods for cooling of rotating electrical machines.
- IS 8789: Values of performance characteristics for three phase Induction motors.
- IS 12065: Permissible limits of noise levels for rotating electrical machines.
- IS 12075: Mechanical vibration of rotating electrical machines.
- IS 12615: Energy efficient Induction motors – Three phase squirrel cage.

### INTERNATIONAL STANDARDS

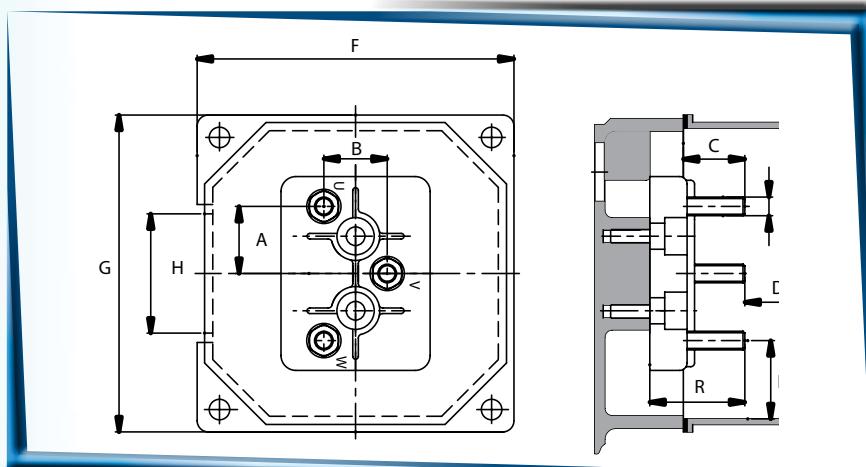

- IEC 34-1: Recommendation for rotating electrical machines.
- IEC 72-1: Recommendation, Dimensions & output rating of electrical machines for foot mounting.
- IEC 72-2: Recommendation of the dimensions and output rating of electrical motors for flange mounting.

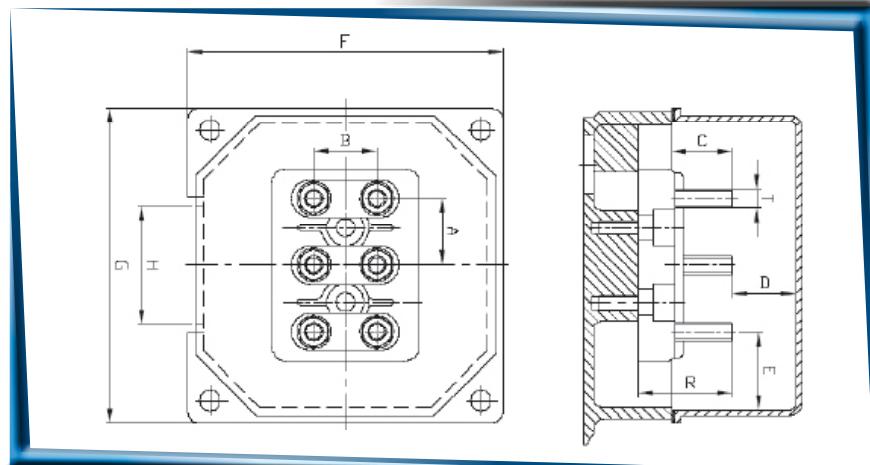

## Terminal Arrangements

All motors are provided with a spacious terminal box made of Aluminium. The terminal boxes provided on top are standard. They can be rotated in steps of 90 degree for all frames. They have IP55 protection. Motors of frame 90 are provided with 3 leads in the terminal box and motor is with star connection. All motors above frame 100 are provided with 6 leads in the terminal box for flexibility of star/delta starting.

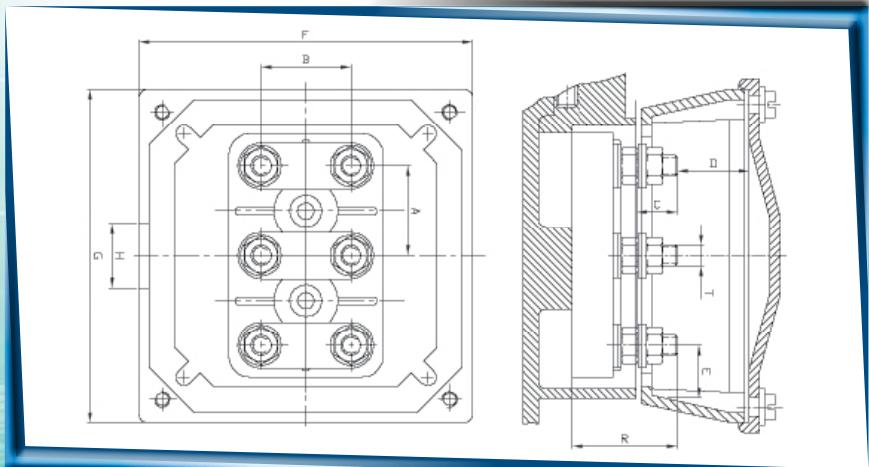

**Fig. 1: 90 frame, 3 terminals, Aluminium terminal box**

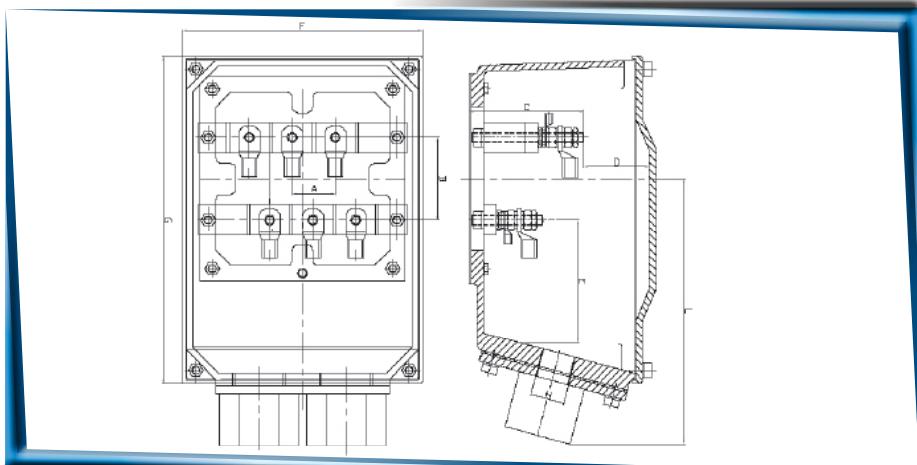

**Fig . 2: 100-112 frames, 6 terminals, Aluminium terminal box**

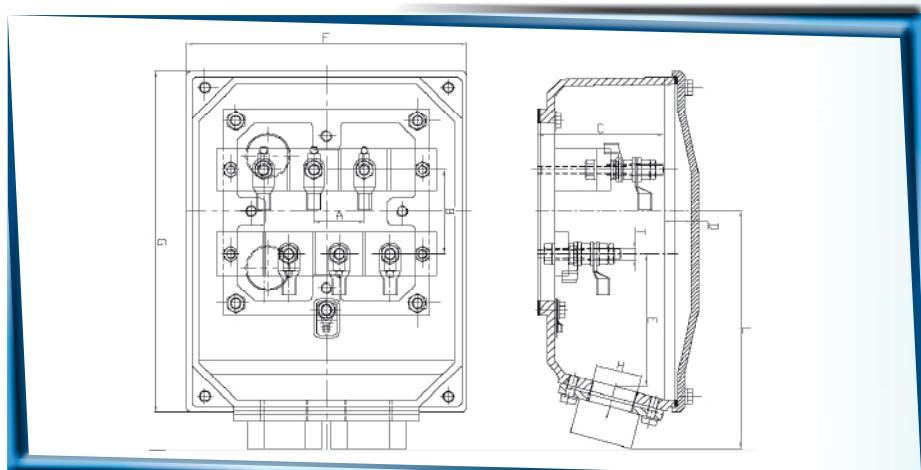

**Fig. 3: 132-160 frames, 6 terminals, Aluminium terminal box**

**Fig 4: 180-200 frames, 6 terminals, Cast Iron terminal box**

**Fig 5: 225-315 frames, 6 Terminal Fabricated Terminal Box**

## TERMINAL BOX DIMENSIONS

| Frame  | T   | A  | B   | C   | D  | E   | F   | G   | H   | L   | R  |

# TERMINAL BOX CONNECTIONS

**Y Connection**

3 terminal, Frame 90 is star connected

TERMINAL CONNECTIONS

Y Connection

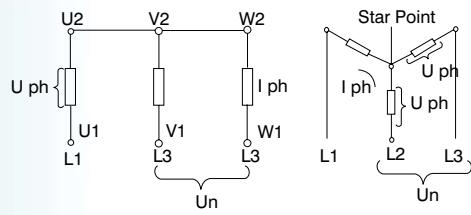

D Connection

## CONNECTING DIAGRAMS

**Y or Star connection**

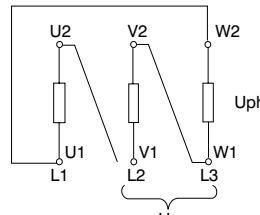

Connecting together the W2, U2, V2 terminals (star point) and connecting to the mains the U1, V1, W1 terminals a star connection is obtained.

The phase current  $I_{ph}$  and phase voltage  $U_{ph}$  are as follows :

$$I_{ph} = I_n / \sqrt{3}$$

$$U_{ph} = U_n / \sqrt{3}$$

**△ or Delta connection**

Connecting the end of each winding to the beginning of the next winding a delta connection is obtained. The phase current  $I_{ph}$  and the phase voltage  $U_{ph}$  are as follows:

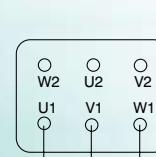

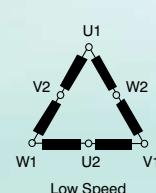

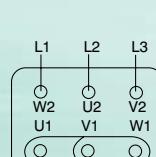

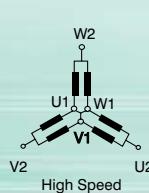

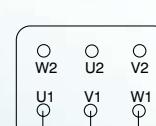

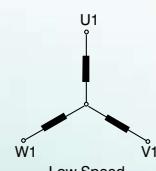

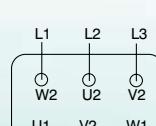

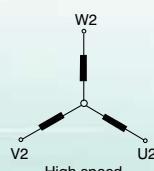

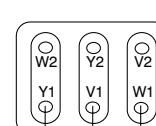

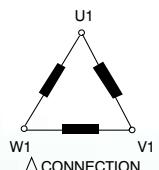

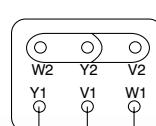

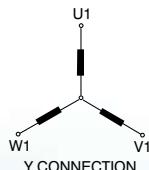

$$I_{ph} = I_n$$

$$U_{ph} = U_n$$

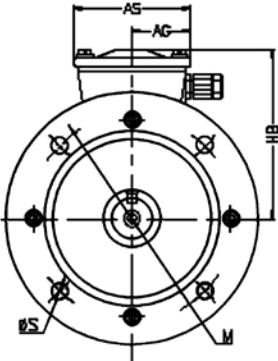

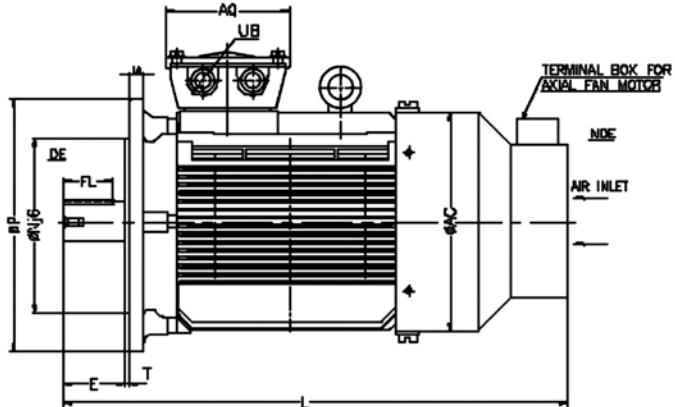

Where :  $I_n$ : the line current  
 $U_n$ : the line voltage

### Star-Delta starting

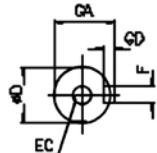

The star delta starting is an easy way to reduce the starting current but the starting torque also gets reduced. Motors can be started with the star delta method only when the supply voltage corresponds to the rated voltage of the motors in the delta connection.

## OPTIONAL FEATURES

The following special features/accessories can be provided for motors on request:

- Non standard voltage &/or frequency
- RTD PT 100
- Epoxy coatings on winding overhangs
- Epoxy based paint
- Standard double shaft extension
- Terminal box on RHS/LHS (seen from Driving side)
- PTC thermistors
- Space Heaters
- Non standard payment shade
- Non standard shaft extension
- Insulated bearings
- Construction in IM B35
